EDUCATION

B.S.
Computer Science
Washington State University
Tri-Cities, WA 📍
Graduating Dec. 2024 🎓
GPA: 3.85

A.A.
Running Start Program
Columbia Basin College
Pasco, WA 📍
June 2020 🎓

RELEVANT COURSES

Advanced Data Structures
Software Engineering
Systems Programming
Probability and Statistics

EXTRACURRICULARS

Coding Cougs 👤
Active club member at WSUTC attending local hackathons and workshops

SKILLS

Programming Languages:
C/C++, HTML, CSS, JavaScript, R, Python, SQL, DAX
Technologies:
Git, React, CI/CD, MS Power Automate, Power BI, MATLAB

CAREER OBJECTIVE

As a computer science student with a strong foundation in C/C++ and an interest in front-end and web development, I am seeking software engineering experience where I can apply my skills and knowledge to real-world projects

WORK EXPERIENCE

Tech Student Intern | Pacific Northwest National Laboratory
Jul 2023-Present
- Developed a user-centric and automated Planner board to track ongoing high-level issues with Power Automate reducing manual work by 99%
- Integrated UX principles to create Power BI reports, revealing key trends and anomalies across 15+ data points
- Implemented technologies such as MS Office Scripts to capture phase durations and Python libraries to personalize visuals

IT Technical Assistant | Washington State University
Sep 2022-Jun 2023
- Collaborated with teaching staff to troubleshoot hardware and software
- Administered real-time monitoring of AV systems across virtual classrooms

Brand Representative | Hollister
Aug 2019-Jul 2023
- Providing personalized assistance to valued customers
- Supporting in onboarding newly hired employees

PROJECTS

Performance Review Capstone Project | React.js/TypeScript
- Developed user interface components and API calls to the .NET backend to capture the performance review process using React
- Collaborated with stakeholders to gather feedback and create a Figma prototype to ensure accurate implementation.
- Deployed CI/CD pipelines using Azure DevOps and utilized git for version control for collaboration and integration

Web Portfolio Website | HTML/CSS/JavaScript
- Formed a static web portfolio website using HTML/CSS/JS to develop frontend fundamentals and create a minimalistic design
- Deployed website hosted by GitHub Pages: [allisteraniceto.co](#)

Banking Account System | C/C++
- Analyzed different data structures such as vectors, linked lists, and binary trees to find efficient ways to store transactions, accounts, and customer objects into memory
